

Preliminary Amendment

Please amend the above-captioned application as follows:

In the Claims

Please cancel claims 1, 13 and 26-32 without prejudice and add the following new claims.

33. (new) An apparatus for manufacturing fiber-reinforced sheet, comprising:
 - a continuous mold surface being arranged in a longitudinal manner, onto which the fiber-reinforced sheet may be formed;
 - a spray mechanism to spray a first outer coat of material onto said mold surface;
 - at least one dispensing mechanism to dispense resin over said first outer coat;
 - at least one applicator mechanism to apply fiber strands over said first outer coat; and
 - a roller mechanism for rolling said fiber strands and said resin.
34. (new) An apparatus according to claim 33, wherein said continuous mold surface comprises:
 - an upper movable surface being arranged in a longitudinal manner; and
 - a feed mechanism to continuously feed sheet onto said upper movable surface.
35. (new) An apparatus according to claim 34, further comprising:
 - a loading area whereby sheet panels may be positioned over said rolled fibers and resin; and
 - a mechanism to draw said resin into said sheet panels to form a rigid composite material.
36. (new) An apparatus according to claim 33, wherein said roller mechanism comprises an automatic roller mechanism which performs transverse rolling patterns across said mold surface.
